### BBQ MOD. ETNA

#### **Recommandations de sécurité:**

Le barbecue doit être installé sur une surface plane et stable avant son utilisation.

Ne pas exposer le barbecue aux intempéries. Le combustible recommandé est le charbon de bois.

Avant de commencer la cuisson, il est recommandé de mettre de la cendre sur les flammes pour ne conserver que des braises incandescentes

ATTENTION: Les parois du barbecue chauffent, il ne faut surtout pas le déplacer pendant son utilisation

ATTENTION: Ne pas utiliser le barbecue dans un endroit fermé

ATTENTION: Ne pas utiliser d'alcool ou d'essence pour allumer ou raviver le feu. Utiliser uniquement des substances d'allumage ayant la norme EN 1860-3

ATTENTION: Maintenir le barbecue éloigné des enfants et des animaux domestiques.

Il est recommandé de nettoyer la grille de cuisson avant la première utilisation

#### **RECOMMANDATIONS:**

Préserver le barbecue des intempéries. La grille de cuisson est fabriquée en acier inoxydable pour le contact alimentaire. Le contact direct de l'incendie a endommagé la peinture intérieure. Peindre l'intérieur avec des anti calorique pulvérisation pour éviter l'oxydation.
