Concernant le sol :

- Bien noter que l'on peut monter un abri Gx uniquement sur un sol parfaitement plan et jamais directement sur de la terre ou sur de la pelouse.

- Il est vivement préconisé d'installer l'abri sur une dalle béton d'au moins 10cm d'épaisseur.

Regarding the ground: **Weitere Hinweise zum Beschaffenheit des Untergrundes:**

- Please note that you can only assemble a Gx shed on completely flat ground and never directly on the ground or on a lawn. Only erect on ground that is stable and packed down.

- It is strongly recommended to put up the shed on a concrete foundation at least 10cm thick.

- Um ein einwandfreies Ergebnis Ihrer Montage, insbesondere in Hinsicht auf die Ausbildung der Spaltmaße der Türen, zu erzielen, ist es zwingend erforderlich, dass der Untergrund absolut waagerecht und eben ist.

- Es wird unbedingt empfohlen, das Gartenhaus auf eine Betonplatte von mindestens 10cm Dicke zu bauen.

Terreno:

- Le Home Garden Gx possono essere costruite solo su terreni perfettamente piani e mai direttamente su terra o prato. Il terreno deve essere stabilizzato e calcato.

- Si consiglia di installare il prefabbricato su un piano in calcestruzzo che abbia uno spessore minimo di 10 cm.

En lo que se refiere al suelo:

- Tenga en cuenta que solamente se puede montar un cobertizo Gx en un suelo perfectamente plano y nunca directamente en la tierra o el césped. Suelo estabilizado y apisonado.

- Se preconiza encarecidamente instalar la caseta de jardín sobre una losa de hormigón de 10 cm de grosor por lo menos.

Voor de ondergrond :

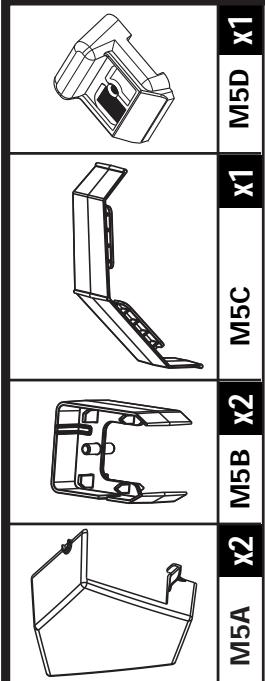

- Let op : een Gx tuinhuis kan slechts op een perfect vlakke ondergrond worden gemonteerd. Plaats het nooit rechtstreeks op de aarde of het grasperk. Een gestabiliseerde en aangestampte ondergrond is vereist.

- Het wordt sterk aangeraden het tuinhuis te installeren op een betonnen plaat van minstens 10cm dik.

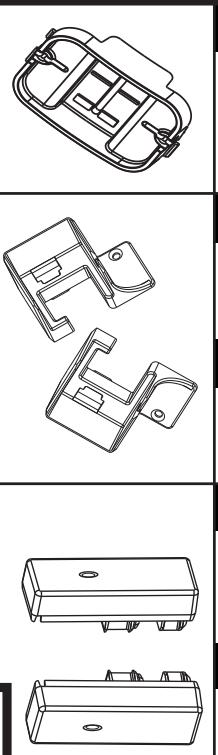

Para o chão :

- Lembre-se que só se pode montar um abrigo Gx num chão perfeitamente plano e nunca directamente na terra ou no relvado. Chão estabilizado e compacto.

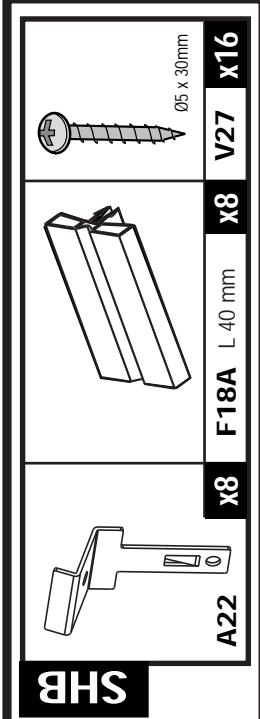

- Aconselha-se vivamente a instalação do abrigo de jardim sobre uma laje de betão com aproximadamente 10 cm de espessura.
